

Asian VC Network Forum 2010

Challenges Ahead and Role of Venture Finance for Accelerating Innovations

Today, Asia is perceived as a region that holds a critical key to maintaining sustainable development of the global economy, thus faces heightened expectations to become a new "Innovation Center". In promoting venture companies – primary drivers of innovation activities – to develop their businesses across the Asian region, venture capital (VC) firms with global perspectives play a critical role, by providing a wide breadth of assistances venture companies need; from supplying risk money to mentoring over corporate management issues.

Based upon such recognition of Asia's role, an international forum titled "Asian VC Network" will be held in Tokyo, with a view to promoting cross-border investment activities of VC firms across the region.

A number of Japanese venture companies with leading-edge technologies will also be invited to participate in the forum, in order to promote their networking opportunities with other Asian VC/VBs.

We look forward to welcoming a wide range of participants to this event.

DATE 2010
